Unit 3 Practice Test – Equations of Lines

Instructions:

1. Write all answers on test paper in pencil
2. Show all of your work!

Part A: Knowledge and Understanding

Quick Answers (1 mark each)

$$y = mx + b$$

1. The slope and y-intercept for $y = -2x + 7$ is:

Slope:

-2

y-intercept:

$+7$

2. The slope and the y-intercept for $y = 0.3x - 0.55$ are:

Slope:

0.3

y-intercept:

-0.55

3. The equation for the line with slope of 3 and y-intercept -1 is:

Equation:

$$y = mx + b$$

$$y = 3x - 1$$

4. The rate of change for $y = 5 - 2x$ is

Rate of change:

-2

5. The equation of the line through $B(0, 2)$ and slope of -6 is

- A $y = -6x + 2$
- B $y = -2x + 6$
- C $y = 6x + 2$
- D $y = -6x$

$$y = mx + b$$

$$2 = (-6)(0) + b$$

$$2 = 0 + b$$

$$b = 2$$

7. Identify the statement true for this graph:

- A The rise is +2 units.
- B The run is +2 units.
- C The rise is -4 units.
- D The x-intercept is -7

8. A banquet hall flat fee of \$500 per night plus \$50 per guest. The independent variable in this situation is:

Independent Variable: # of guests

9. The dependent variable in the situation above is:

Dependent Variable: Total Cost (\$)

$$C = 50g + 500$$

Name:

Date:

$$y = mx + b$$

10. Determine the equation of each line on the grid shown below. (3 marks)

Equation of Line A:

$$y = mx + b$$

$$y = -\frac{3}{4}x + 5$$

Equation of Line B:

$$\frac{0}{7} = 0$$

$$y = mx + b$$

$$y = 0x - 1$$

$$y = -1$$

Equation of Line C:

$$y = mx + b$$

$$y = 2x - 4$$

11. Graph the equations given below on the axes provided. (6 marks)

Equation A: $y = \frac{1}{4}x - 1$

Equation B: $y = -2x + 5$

Equation C: $y = -4$

Equation D: $x = -3$

Name:

Date:

Part B: Application

- Determine the x-intercept and y-intercept of the standard form equation given below, then graph the line on the grid provided. (6 marks)

$$-4x + 2y - 8 = 0$$

$$-4x + 2y - 8 = 0$$

x-int	y-int
$\begin{aligned} -4x - 8 &= 0 \\ -4x &= 8 \\ \frac{-4x}{-4} &= \frac{8}{-4} \\ x &= -2 \end{aligned}$	$\begin{aligned} 2y - 8 &= 0 \\ 2y &= 8 \\ \frac{2y}{2} &= \frac{8}{2} \\ y &= 4 \end{aligned}$

- Rearrange the standard form equation given below into slope y-intercept form ($y = mx + b$), then graph the line on the grid provided. (4 marks)

$$-6x + 4y + 12 = 0$$

$$\begin{aligned} -6x + 4y + 12 &= 0 \\ +6x & \quad -12 \quad 6x - 12 \end{aligned}$$

$$\frac{4y}{4} = \frac{6x - 12}{4}$$

$$y = \frac{6}{4}x - 3$$

$$y = \frac{3}{2}x - 3$$

Name:

Date:

3. Determine the equation of the line that goes through the points $(-2, 8)$ and $(7, -10)$. (4 marks)
YOU MUST DO THIS WITHOUT GRAPHING, SHOW ALL OF YOUR WORK

$(-2, 8)$ $(7, -10)$
 x_1 y_1 x_2 y_2

$$m = \frac{y_2 - y_1}{x_2 - x_1}$$

$$m = \frac{-10 - 8}{7 - (-2)}$$

$$m = \frac{-18}{9}$$

$$m = -2$$

$y = mx + b$
 $-10 = (-2)(7) + b$
 $-10 = -14 + b$
 $+14$ $+14$
 $4 = b$

$y = -2x + 4$

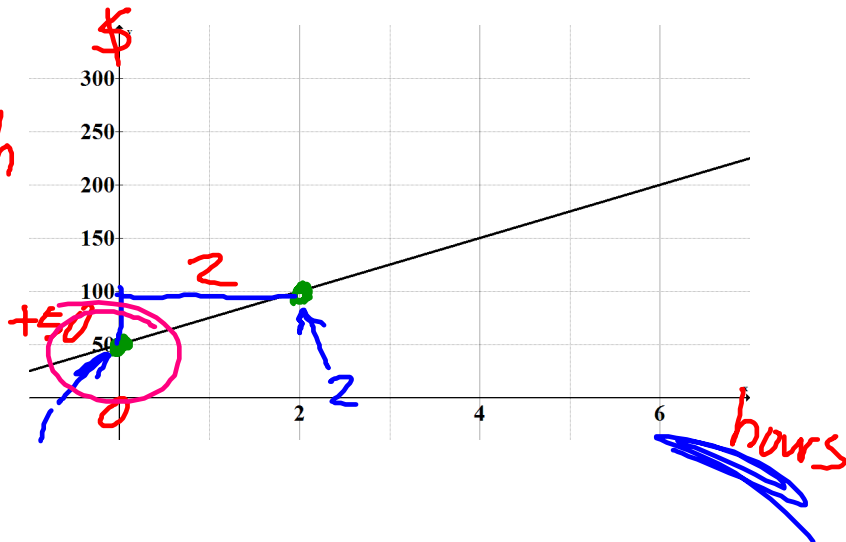

4. The graph below is used to determine the cost of a service call for furnace repairs. The x-axis represents the number of hours and the y-axis the total cost. (2 marks)

a. Determine the slope of the line.

$\frac{\text{rise}}{\text{run}} = \frac{50}{2} = \underline{\underline{\$25/h}}$

b. Write an equation that represents the cost of furnace repairs.

$C = 25h + 50$

Part C: Thinking Inquiry and Problem Solving

1. After trick or treating, Clark has 63 chocolate bars. He eats 7 per day.

a) Write an equation to model the situation. (2 marks)

$$C = -7d + 63$$

b) How many chocolate bars does Clarke have left after 3 days? (1 mark)

$$C = -7d + 63$$

$$C = (-7)(3) + 63 \rightarrow C = 42$$

$$C = -21 + 63 \rightarrow \therefore \text{he has 42 chocolate bars after 3 days.}$$

c) After how many days does Clarke run out of chocolate bars? (1 mark)

$$C = -7d + 63$$

$$0 = -7d + 63 \rightarrow -63 = -7d \rightarrow +9 = d$$

After 9 days, Clarke will have no chocolate left

2. Determine the y-intercept of the line with a slope of 3 through the point (-2, 7). (2 marks)

$$y = mx + b$$

$$7 = (3)(-2) + b$$

$$7 = -6 + b \Rightarrow b = 13$$

3. The equation of a line is $y = -3x - 2$

Determine the coordinates of any 3 different points that lie on this line. (3 marks)
YOU MUST DO THIS WITHOUT GRAPHING, SHOW ALL OF YOUR WORK

$$y = -3(0) - 2 \rightarrow y = -2 \rightarrow (0, -2)$$

$$y = -3(1) - 2 \rightarrow y = -5 \rightarrow (1, -5)$$

$$y = -3(2) - 2 \rightarrow y = -8 \rightarrow (2, -8)$$

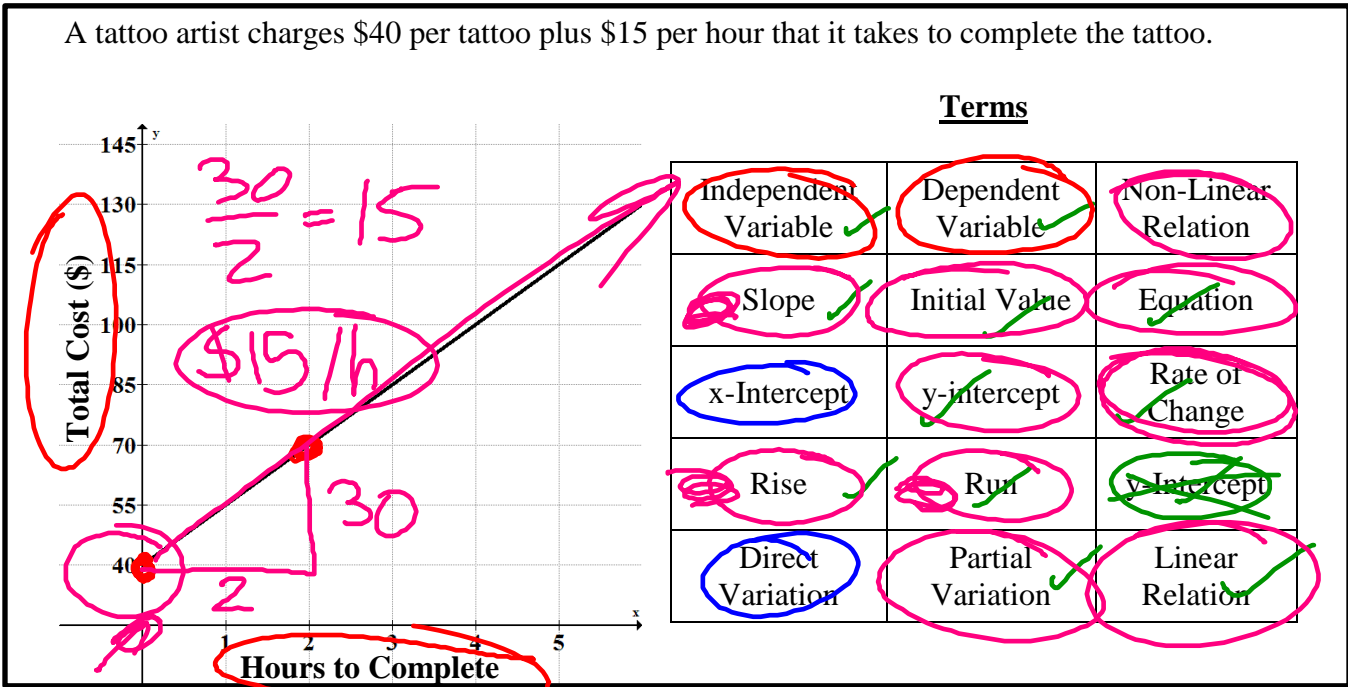

Name:

Date:

Part D: Communication

1. Write a description of the situation below using 6 of the terms provided in the table. (3 marks)

A tattoo artist charges \$40 per tattoo plus \$15 per hour that it takes to complete the tattoo.

$$C = 15h + 40$$

Describe or list the steps that you would take to sketch a graph of the line represented by the equation

$$y = \frac{1}{3}x - 1. \text{ (4 marks)}$$

rise 1
run 3
