

# Pizza Wars

Boathouse Pizza is looking for the best pizza maker in the town to help boost profits.

\_\_\_\_\_ currently works at Pizza Pizza and

\_\_\_\_\_ currently works at Rombos.

I was able to collect data on how many pizzas each of them made in their last 8 shifts.

**Who should Boathouse steal to work for them?**

## Number of Pizzas Made per Shift

	54	152	180	12	72	126	104	132
	132	104	102	120	86	12	180	96

Use the space below to determine the mean, median, mode and range for each employee.

<b>Name:</b>	<b>Name:</b>																																																																								
<b>Mean:</b>	<b>Mean:</b>																																																																								
<b>Median:</b>	<b>Median:</b>																																																																								
<b>Mode:</b>	<b>Mode:</b>																																																																								
<b>Range:</b>	<b>Range:</b>																																																																								
<p style="text-align: center;"><b>Standard Deviation</b></p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: center;"><i>value (<math>\bar{x}</math>)</i></th> <th style="text-align: center;"><math>\bar{x} - mean</math></th> <th style="text-align: center;"><math>(\bar{x} - mean)^2</math></th> </tr> </thead> <tbody> <tr><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td></tr> <tr> <td colspan="2" style="text-align: right;"><b>Total</b></td> <td> </td> </tr> </tbody> </table>	<i>value (<math>\bar{x}</math>)</i>	$\bar{x} - mean$	$(\bar{x} - mean)^2$																															<b>Total</b>			<p style="text-align: center;"><b>Standard Deviation</b></p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: center;"><i>value (<math>\bar{x}</math>)</i></th> <th style="text-align: center;"><math>\bar{x} - mean</math></th> <th style="text-align: center;"><math>(\bar{x} - mean)^2</math></th> </tr> </thead> <tbody> <tr><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td></tr> <tr> <td colspan="2" style="text-align: right;"><b>Total</b></td> <td> </td> </tr> </tbody> </table>	<i>value (<math>\bar{x}</math>)</i>	$\bar{x} - mean$	$(\bar{x} - mean)^2$																															<b>Total</b>
