Using your Cheat Sheet

Learning Goal - I will understand what regression is and will be able to perform analyses on the TI-83s.

Minds on

Linear, Quadratic, Exponential or Neither?

Looks quadratic because of the slight upward curve on both sides. Appears to hit a **minimum value** around 1940.

Exponential could be close if you ignore the first point.

Linear would be a great fit from about 1959 onward. Not so much before that.

This will be an opportunity to take your cheat sheet for a test drive.

Be sure to take note of anything your sheet may be lacking and FIX IT!

Remember, you can bring the cheat sheet into your test.

Please see PDFs on website.
