- Identify the variable(s).
- What type of graph should be used to display the data? Why?
- Draw an appropriate graph in the space provided above.
- Give two descriptive statements about this data set.

<b>Age (years)</b>	14	16	17	15	18	19	19	18	13	15	16	16	16	14	17
<b>Physical Activity (hours)</b>	3	0	4	10	1	6	5	9	10	0	0	14	10	7	0

- Identify the variable(s).
- What type of graph would be appropriate for this data set? Why?
- Pose a question that would require one-variable analysis.
- Pose a question that would require two-variable analysis.

We will use the table below to record the hand lengths of each member of our class.  
Your hand length is the distance from the butt of your hand to the tip of your middle finger.

- a. What type of graph should be used to display the data? Why?
  
- b. Draw an appropriate graph below.
